Total % of the top 10 of Holdings	65%	71%	75%
Average price	99.08	96.91	95.62

1: Source - Desjardins Global Asset Management Inc. & Bloomberg

2: Projected MER of 0.75%

3: Income tax rate of 53.31%, capital gain tax rate of 26.66% for personal investments and 35.54% for corporate investment which is the highest in Quebec considering an inclusion rate of 50.00% for personal investments and 66.67% for corporate investments. Quebec's marginal tax rate increases as your income increases so you pay higher taxes on the level of income that falls into a higher tax bracket.

4: Equivalent yield to maturity allows to illustrate the yield of a solution generating interest income and capital gains in comparison to a solution generating interest income exclusively. It takes into account the tax rate on interest income and capital gains to calculate the yield to maturity net of fees and taxes. Calculation results may vary depending on various factors, such as, but not limited to, fees and expenses, tax rate, timing of transaction, market fluctuations and portfolio composition. The yield to maturity simply corresponds to the yield of a bond that would be held by an investor until its maturity.

Tax efficiency dependent upon the proportion of discount bonds held by the Funds, which cannot be predicted and is expected to fluctuate over time, depending on prevailing market conditions as well as the impact and timing of subscriptions and redemptions. There can be no assurance that the Canada Revenue Agency will agree with the tax treatment adopted by the Fund. Tax efficiency may vary per individual – contact your tax specialist to evaluate your situation.
